

Ikarus::toLamesFirstParameter
AndShearModulus

Ikarus::toYoungsModulusAnd
PoissonsRatio

Ikarus::convertLameConstants

```
graph LR; A[Ikarus::toLamesFirstParameter  
AndShearModulus] --> C[Ikarus::convertLameConstants]; B[Ikarus::toYoungsModulusAnd  
PoissonsRatio] --> C;
```

The diagram illustrates a functional dependency where two separate input functions or methods are combined into a single output function. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'Ikarus::toLamesFirstParameter AndShearModulus' and the bottom box contains 'Ikarus::toYoungsModulusAnd PoissonsRatio'. Blue arrows originate from the right side of each of these boxes and point towards a single gray rectangular box on the right. This gray box contains the text 'Ikarus::convertLameConstants', representing the combined output of the two input functions.
