

lkarus::operator+=

lkarus::operator-=

lkarus::correctionSize

```
graph LR; A[lkarus::operator+=] --> C[lkarus::correctionSize]; B[lkarus::operator-=] --> C; C --> C;
```

The diagram illustrates a state transition or dependency graph. On the left, two rectangular boxes are stacked vertically. The top box contains the text 'lkarus::operator+=', and the bottom box contains 'lkarus::operator-='. Both boxes have black outlines and white backgrounds. On the right, a single rectangular box contains the text 'lkarus::correctionSize'. This box has a black outline and a light gray fill. Two blue arrows originate from the right side of the left boxes and point towards the left side of the 'lkarus::correctionSize' box. A blue curved arrow, representing a self-loop, starts from the top right corner of the 'lkarus::correctionSize' box and points back to its top left corner.
