

Ikarus::KirchhoffLoveShell  
::calculateMatrixImpl

Ikarus::KirchhoffLoveShell  
::calculateScalarImpl

Ikarus::KirchhoffLoveShell  
::calculateVectorImpl

Ikarus::KirchhoffLoveShell  
::displacementFunction

```
graph LR; A[Ikarus::KirchhoffLoveShell::calculateMatrixImpl] --> D[Ikarus::KirchhoffLoveShell::displacementFunction]; B[Ikarus::KirchhoffLoveShell::calculateScalarImpl] --> D; C[Ikarus::KirchhoffLoveShell::calculateVectorImpl] --> D;
```

The diagram illustrates a design pattern where three separate implementation methods (calculateMatrixImpl, calculateScalarImpl, and calculateVectorImpl) all delegate to a single method (displacementFunction). The source boxes are white with black borders, while the target box is gray with a black border. Blue arrows indicate the direction of the delegation.
