

Ikarus::utils::globalIndex
FromGlobalPosition

Ikarus::utils::obtainLagrange
GlobalNodePositions

Ikarus::utils::forEachLagrange
NodePosition

```
graph LR; A[Ikarus::utils::globalIndex<br/>FromGlobalPosition] --> C[Ikarus::utils::forEachLagrange<br/>NodePosition]; B[Ikarus::utils::obtainLagrange<br/>GlobalNodePositions] --> C;
```

The diagram illustrates a data flow where two separate inputs are combined into a single output. On the left, there are two white rectangular boxes. The top box contains the text 'Ikarus::utils::globalIndex' and 'FromGlobalPosition'. The bottom box contains 'Ikarus::utils::obtainLagrange' and 'GlobalNodePositions'. Blue arrows point from the right side of each of these two boxes to the left side of a single gray rectangular box on the right. This gray box contains the text 'Ikarus::utils::forEachLagrange' and 'NodePosition'.
