

Ikarus::EAS::EASVariant
::isDisplacmentBased

Ikarus::EAS::EASVariant
::setEASType

Ikarus::EAS::EASVariant
::numberOfEASParameters

```
graph LR; A["Ikarus::EAS::EASVariant  
::isDisplacmentBased"] --> C["Ikarus::EAS::EASVariant  
::numberOfEASParameters"]; B["Ikarus::EAS::EASVariant  
::setEASType"] --> C;
```

The diagram illustrates a dependency or relationship between three code elements. On the left, there are two white rectangular boxes. The top box contains the text 'Ikarus::EAS::EASVariant' followed by '::isDisplacmentBased' on a new line. The bottom box contains 'Ikarus::EAS::EASVariant' followed by '::setEASType' on a new line. On the right, there is a gray rectangular box containing 'Ikarus::EAS::EASVariant' followed by '::numberOfEASParameters' on a new line. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both the 'isDisplacmentBased' and 'setEASType' methods or properties are associated with or depend on the 'numberOfEASParameters' attribute.
