

Ikarus::KirchhoffLoveShell
::calculateMatrixImpl

Ikarus::KirchhoffLoveShell
::calculateScalarImpl

Ikarus::KirchhoffLoveShell
::calculateVectorImpl

Ikarus::KirchhoffLoveShell
::displacementFunction

```
graph LR; A["Ikarus::KirchhoffLoveShell  
::calculateMatrixImpl"] --> D["Ikarus::KirchhoffLoveShell  
::displacementFunction"]; B["Ikarus::KirchhoffLoveShell  
::calculateScalarImpl"] --> D; C["Ikarus::KirchhoffLoveShell  
::calculateVectorImpl"] --> D;
```

The diagram illustrates a design pattern where three separate implementation methods (calculateMatrixImpl, calculateScalarImpl, and calculateVectorImpl) are all directed towards a single, central method (displacementFunction). The central method is highlighted with a gray background, while the three source methods are in white boxes with black borders. Blue arrows indicate the direction of the relationships from the source methods to the target method.
