

Ikarus::NonLinearElastic
::calculateMatrixImpl

Ikarus::NonLinearElastic
::calculateScalarImpl

Ikarus::NonLinearElastic
::calculateVectorImpl

Ikarus::NonLinearElastic
::strainFunction

```
graph LR; A[Ikarus::NonLinearElastic::calculateMatrixImpl] --> D[Ikarus::NonLinearElastic::strainFunction]; B[Ikarus::NonLinearElastic::calculateScalarImpl] --> D; C[Ikarus::NonLinearElastic::calculateVectorImpl] --> D;
```

The diagram illustrates a design pattern where three separate implementation methods (calculateMatrixImpl, calculateScalarImpl, and calculateVectorImpl) are used by a single public method (strainFunction). The three implementation boxes on the left are white with black borders, while the strainFunction box on the right is gray with a black border. Blue arrows point from each implementation box to the strainFunction box.
