

lkarus::operator+=

lkarus::operator-=

lkarus::correctionSize

```
graph LR; A[lkarus::operator+=] --> C[lkarus::correctionSize]; B[lkarus::operator-=] --> C; C --> C;
```

The diagram illustrates a state transition or dependency graph. On the left, there are two rectangular boxes: the top one contains the text 'lkarus::operator+=', and the bottom one contains 'lkarus::operator-='. On the right, there is a single rectangular box with a light gray fill and a black border, containing the text 'lkarus::correctionSize'. A blue arrow points from the right side of the 'lkarus::operator+=', box to the left side of the 'lkarus::correctionSize' box. Another blue arrow points from the right side of the 'lkarus::operator-=', box to the left side of the 'lkarus::correctionSize' box. A curved blue arrow originates from the top right corner of the 'lkarus::correctionSize' box and points back to its top left corner, forming a self-loop.
